## INTRODUCTION – GIỚI THIỆU

The range of MEC enclosures is a complete offer of monoblock enclosures for assembling small and medium-sized electrical automation panels, control panels and switchboards.

The typical use of MEC Enclosures is to assemble control panels for a very wide variety of industrial machines: from large machinery with automated production lines or parts of these, down to the typical installations of on-board machine switchboards, boilers, heating plants and so on.

The MEC Enclosures can be also used for assembling the secondary distribution boards, due to the possibility, when using 400, 600, 800 and 1000 mm widths, of installing the whole range of apparatus and modular circuit-breakers on DIN rails combined with special pre-drilled and hinged modular front panels, allowing construction distribution switchboards thanks to the availability of a series of accessories (modular panels, DIN rails).

Vỏ tủ điện MEC cung cấp đầy đủ các tủ loại đơn, nhỏ gọn để lắp đặt các tủ điện phân phối, điều khiển và tự động hóa vừa và nhỏ.

Công dụng điển hình của tủ MEC là chế tạo tủ điều khiển cho rất nhiều loại máy công nghiệp: từ máy móc lớn với dây chuyền sản xuất tự động hoặc các bộ phận của chúng, cho đến lắp đặt điển hình tủ chính của máy, nồi hơi, lò đốt,.. vv.

Tủ MEC cũng cho phép lắp đặt các tủ phân phối thứ cấp trong các tủ có chiều rộng 400mm, 600mm, 800mm, 1000mm lắp đặt toàn bộ thiết bị trên các tấm thiết bị và bộ ngắt mạch mô-đun trên thanh ray DIN kết hợp với các lỗ cắt mặt trước hoặc trên cửa modul. Lắp đặt các tủ điện phân phối dễ dàng nhờ các phụ kiện lắp đặt có sẵn (Tấm thiết bị, thanh ray DIN).
